Senior Software Engineer

- Built Fraud Detection module for Magento
- Created LDAP Authentication module for Magento
- Built custom Order Management System for Ray-Ban Magento
- Rebuilt incentives functionality for <http://www.oakley.com> Rails back-end

REFERENCES

Scott Weaver is not only a highly-skilled developer and a quick-witted problem solver. He is also an even-tempered leader that develops teams with humor, patience, and a deep understanding of necessary technologies.

– Nicholas Campbell, Front-end Developer at Sagepath

Scott is one of the most gifted and reliable developers I've had the pleasure to work with. We worked remotely in a dynamic team, where he was able to both deliver on tough deadlines, as well as keep his teammates up to speed. I would highly recommend him as a rock solid foundation to a high level dev team.

– Asaf Zamir, CTO at Cloud With Me

Scott has always been very knowledgeable as a developer. He has very strong PHP, and MySQL skills as well as a desire to learn as much as possible about subjects that interest him. In the year that I worked with him I learned a lot about web development, and even now that we don't work together but stayed friends, I continue to learn from him. I would highly recommend Scott to anyone or any company that needs a qualified developer.

– Javier Martinez, Software Developer at BLITZ
